The main objective of this analysis is to identify and understand the factors that affect employee attrition using HR data.

Key KPIs

Total Employees - 1470

Total Employees Left - 237

Overall Attrition Rate - 16.12%

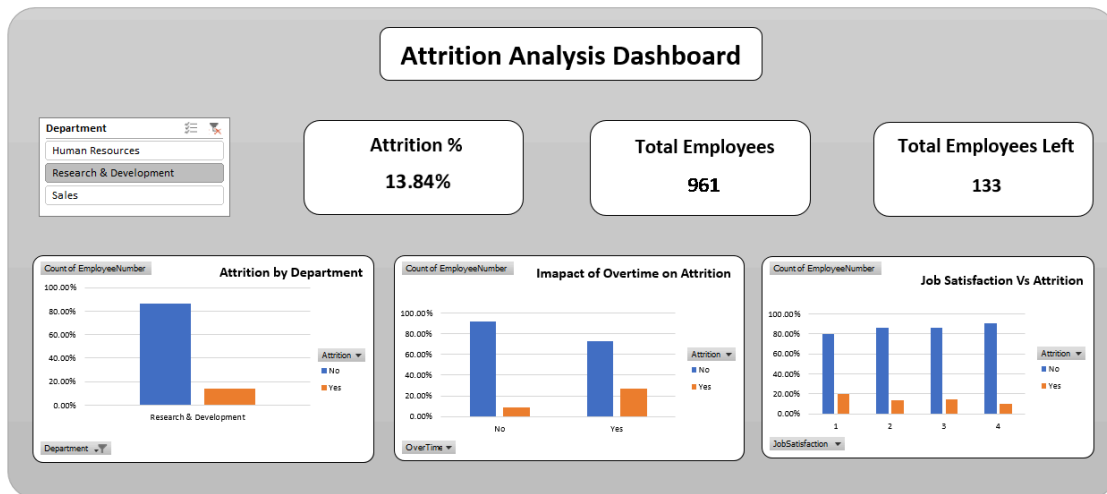

Key Insights

- Sales Department got highest Attrition Rate of 20.63%
- Job Satisfaction Rating is inversely related to the Attrition Rating, as Job Satisfaction Rating increases Attrition Decreases.
- Overtime overrides the Job Satisfaction Rating, as even though Job Satisfaction decreases Attrition Rate, Overtime can increase the possibility of employee turnover.
- Employees with Work Life Balance Rating as 1 got highest Attrition Rate of 31%
- Employees working overtime are 3x more likely to leave the company.

Business Recommendations

- Overtime Work should be limited or monitored
- Job Satisfaction can be improved through feedback, recognition and growth plans
- Retention Strategies should be applied on Department that are prone to attrition

Results

Conclusion

The analysis indicates that employee attrition is significantly influenced by overtime work, low job satisfaction, and poor work–life balance. Departments such as Sales show higher attrition risk compared to others. Employees working overtime with lower job satisfaction are the most vulnerable group.
